

## Business Knox-Box Rapid Entry System

Get yours **NOW** by calling your Fire Department Inspector at  
**513-897-3010**

In order to access business buildings quickly, minimize forced entry damage, and protect EMS/Firefighters from injury, we have adopted the Knox-Box Rapid Entry System. Currently, more than seven thousand fire departments and the communities they protect enjoy the benefits of this proven system.

DO YOU have business buildings or property in Wayne Township & Waynesville secured by locked doors or a gate? You can PREVENT UNNECESSARY DAMAGE to your building or gate in the event of an emergency by participating in this program. The Knox lock box system can give the Fire Department emergency access while giving you peace of mind that your property is secure. The Wayne Township Fire/EMS Department has invested in this system. Should you?

### HOW THE SYSTEM WORKS

Knox-Boxes are constructed of ¼" solid steel with a ½" steel door and reinforced locking mechanism. They are UL listed against physical attack and for drill, pick and pull resistance. The master key to open the Knox-Box is held ONLY by the Wayne Township Fire/EMS Department. This high security key is strictly controlled and is manufactured only by the Medeco factory under direction from an authorized fire official's signature.

A property owner who wishes to join the system should make arrangements with their fire inspector to acquire a lock box or padlock. The Knox Box shown to the right is a typical building type box. Knox-Boxes are specified by Wayne Township Fire/EMS Department but are purchased directly from the Knox Company. Once installed near the entrance to your property, the department

locks your building entrance key inside the Knox-Box so that it is available onsite for future emergencies.

Also have system for use on Entry Gates.

If you have any further questions feel free to call your Fire Chief at 513-897-3010.
